

SUBHASHREE BEHERA

AI & Full-Stack Developer | Python Automation | Web Scraping

sweety22313@gmail.com • +91 7008088959 • India • [GitHub](#) • [LinkedIn](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in full-stack web development, AI integration, Python automation and web scraping. Skilled in building responsive web applications using React and Next.js, integrating LLMs with structured output enforcement, automating data workflows with Python, and extracting structured data from the web. Delivered multiple real-world projects including deployed AI-powered web apps, automated Excel dashboards and professional web scrapers. Hackathon winner with proven ability to perform under pressure both individually and in teams. Actively seeking remote internship or junior developer opportunities with global companies.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), Python, HTML5, CSS3, C++, SQL, TypeScript
Frameworks	React.js, Next.js, Node.js, Flask, FastAPI, Tailwind CSS
JavaScript	Async/Await, Fetch API, JSON, DOM Manipulation, ES6+, OOP, LocalStorage
Styling	CSS3, Tailwind CSS, Responsive Design, Mobile-First, CSS Animations, Flexbox, Grid
Python Tools	pandas, BeautifulSoup, Selenium, Playwright, Pydantic, xlswriter, requests, Virtual Environments
AI & APIs	Gemini API (2.5 Flash), OpenAI API, Structured Output Enforcement, Prompt Engineering, RAG (learning)
Data & DB	Excel Automation, CSV Processing, SQLite, JSON Schema, Data Cleaning, Data Visualization
Dev Tools	Git, GitHub, VS Code, Chrome DevTools, REST APIs, Command Line, npm, pip
AI Tools	Claude AI, Cursor, GitHub Copilot, V0.dev, AI Assisted Development
Deployment	Netlify, GitHub Pages, Vercel, Railway, Error Handling, Logging
Human Languages	English (Fluent), Korean (Conversational, Hangul proficient, TOPIK prep)
Soft Skills	Fast learner, Clear communicator, Detail-oriented, Self-motivated, Team player

PROJECTS

K-Trust — Korean Market Compliance Portal | *Next.js 15, TypeScript, Tailwind CSS, Python, FastAPI, Google Gemini 2.5 Flash, Pydantic, Vercel, Railway* [Live Demo](#) | [GitHub](#)

- Built an AI-powered B2B compliance verification system that audits South Korean merchants — producing trust scores, legal status, financial health signals and public sentiment analysis
- Implemented structured output enforcement using Gemini 2.5 Flash's response_schema with Pydantic models, guaranteeing typed, parseable JSON from the LLM with no defensive parsing needed
- Designed full-stack architecture: Next.js frontend deployed on Vercel, FastAPI backend on Railway, with O(1) merchant lookup from a structured mock intelligence database
- Engineered deterministic AI compliance scoring via strict prompt rubrics, simulating scraped Korean court records, tax filings and Naver/Kakao sentiment data as unstructured LLM input

SweetyCodes — AI-Powered Interactive Portfolio | *Next.js 15, React, TypeScript, Tailwind CSS, Framer Motion, Gemini API, Vercel* [Live Demo](#) | [GitHub](#)

- Built a full-stack portfolio with a Gemini-powered AI chatbot trained on resume data — answers recruiter questions in natural language with context-aware responses
- Engineered a freely draggable floating chat widget with animated character states (idle, dance, sing, eat, sleep, spin) using Framer Motion and custom CSS animations
- Implemented full EN/KR bilingual toggle with real-time language switching and complete Hangul localization across all UI components
- Integrated dynamic video backgrounds and audio that adapt to time of day; deployed on Vercel with TypeScript throughout (98.8% of codebase)

Bilingual Korean-English Weather App | *HTML, CSS, JavaScript, OpenWeather API* [Live Demo](#)

- Built a fully responsive weather application supporting real-time language switching between English and Korean
- Integrated OpenWeather API for live weather data including temperature, humidity and 5-day forecast
- Deployed on GitHub Pages — accessible globally with mobile-first responsive design; demonstrates bilingual localization skills directly relevant to Korean tech market

Python Web Scraper with Excel Dashboard | *Python, BeautifulSoup, requests, pandas, xlswriter*

- Built professional OOP-based web scraper with file logging, dual-level error handling and auto-timestamped output
- Extracted and cleaned product data (title, price, rating, stock) from live e-commerce website
- Generated formatted Excel reports with pie charts and bar charts on a professional dashboard sheet

Automated Sales Data Excel Report | *Python, pandas, xlswriter*

- Built data pipeline that cleans raw CSV sales data, removes duplicates, standardizes formatting
- Generated professional multi-sheet Excel reports with category summaries and overall metrics; handles encoding issues including Korean and special characters using utf-8-sig

Batch File Organizer with Audit Log | *Python, os, shutil, csv*

- Built desktop automation tool that organizes files by type into categorized folders automatically
- Implemented duplicate-safe file moving with unique filename generation; generated CSV audit log for every file moved with timestamp

EDUCATION

Bachelor of Science in Computer Science | Khallikote Unitary University, Odisha, India | 2022 – 2026 (Graduating 2026)

CERTIFICATIONS

HackerRank Python (Basic) — HackerRank | 2025 | [View Certificate](#)

KMOOC Data Science and Artificial Intelligence — Korea National Open University | October 2025

Full Stack Web Development — FreeCodeCamp + CS50W | Self-Learned

Git and GitHub Version Control — Self-Learned | Practiced Daily

ACHIEVEMENTS

1st Place — Code Relay *Intercollege Hackathon | January 2026 | Team*

Won first place in team coding relay competition against multiple college teams. Demonstrated rapid problem solving and collaborative coding under time pressure.

2nd Place — Bug Buster *Intercollege Hackathon | January 2026 | Individual*

Secured second place individually in bug fixing competition. Identified and resolved complex code bugs faster than most competing teams.

2nd Place — Solution Sprint *Intercollege Hackathon | January 2026 | Team*

Second place in team solution building sprint. Collaborated to design and present a working technical solution within strict time constraints.

Keynote Speaker — Blockchain Seminar *Khallikote University | Year 1*

Delivered a keynote presentation on blockchain technology at a university seminar as a first-year student.

ADDITIONAL

- Preparing for TOPIK (Test of Proficiency in Korean) — studying Korean language actively
- 2x open source contributor to PassiveRecon-Aggregator (konswe/PassiveRecon-Aggregator), a Python passive recon tool using Shodan & Crt.sh APIs — PR #2: implemented execution time tracking; PR #13: proposed, designed and built a full passive WHOIS lookup module (whois_recon.py) with concurrent execution, graceful error handling, and ISO date serialization — both PRs reviewed and merged by maintainer
- Available immediately for remote internship or freelance work globally
